

Provided by your Police Chief

Texting and driving takes your eyes off the road for an average of 5 seconds. At 55 mph, that's like driving the length of a football field completely blind! Doesn't sound too smart does it?

Distracted driving injures 330,000 people every year and car accidents kill 11 teens every day!

Currently there is no national ban on texting or using a wireless phone while driving, but a number of states have passed laws requiring either hands free devices and or no texting while driving. For more information please visit www.ghsa.org
